

Dairy FMM

*Optimal business operations
without surprises*

*The 5 groups that need to be in balance
for optimal, stressless farming*

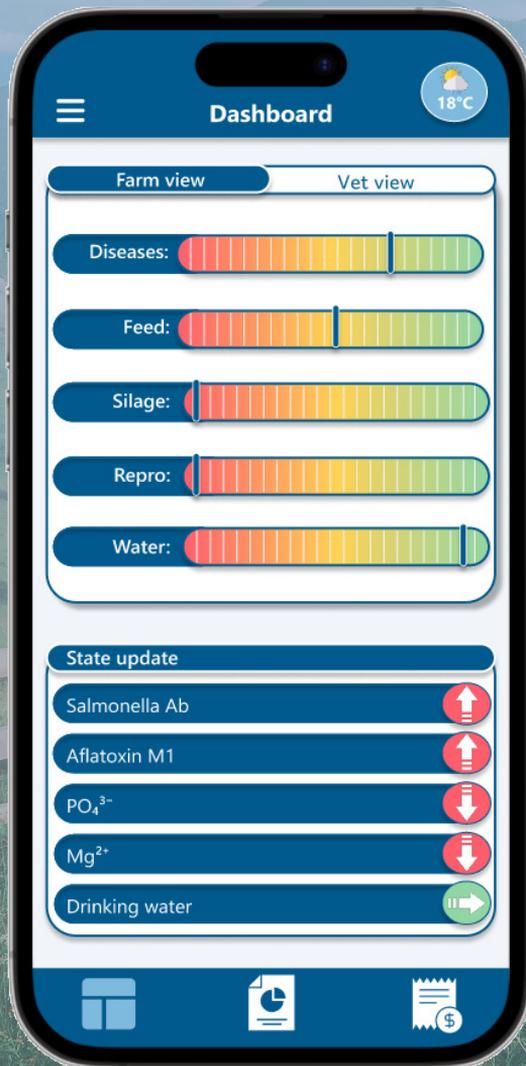

ELDC has developed a well-chosen collection of lab-tests which show the exact state of each of the 5 groups

for optimal and up-to-date support of your farming

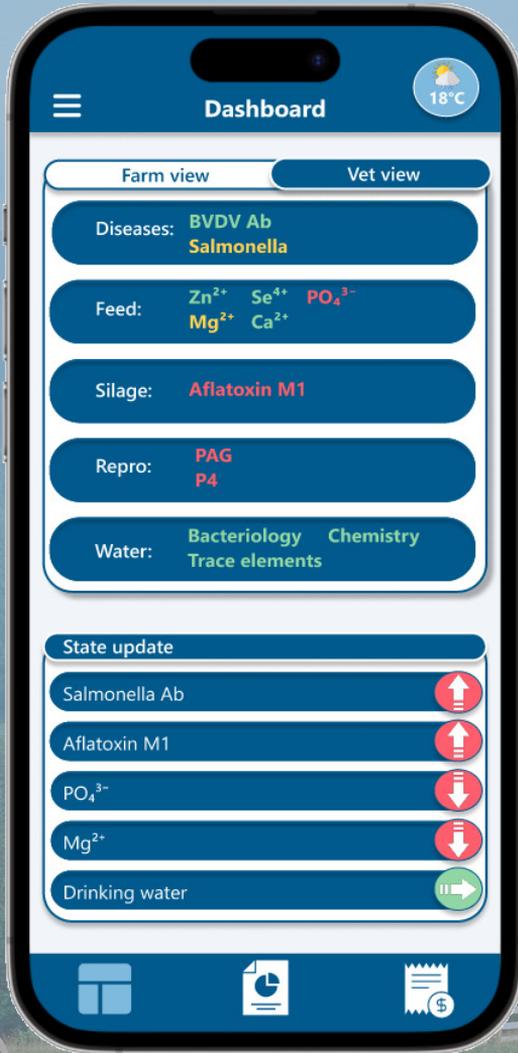

Farm and Vet view

Anytime and anywhere a complete view on business operations

Farm view

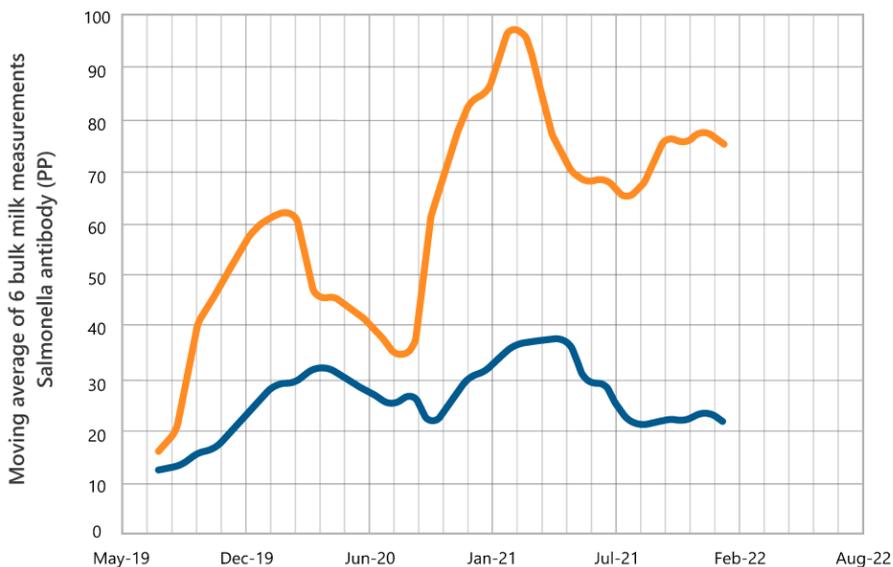

Vet view

Next to Farm view and Vet view, a third layer can be selected, which shows the progression over time of for example increasing Salmonella Ab-levels

Progression of Salmonella infection level

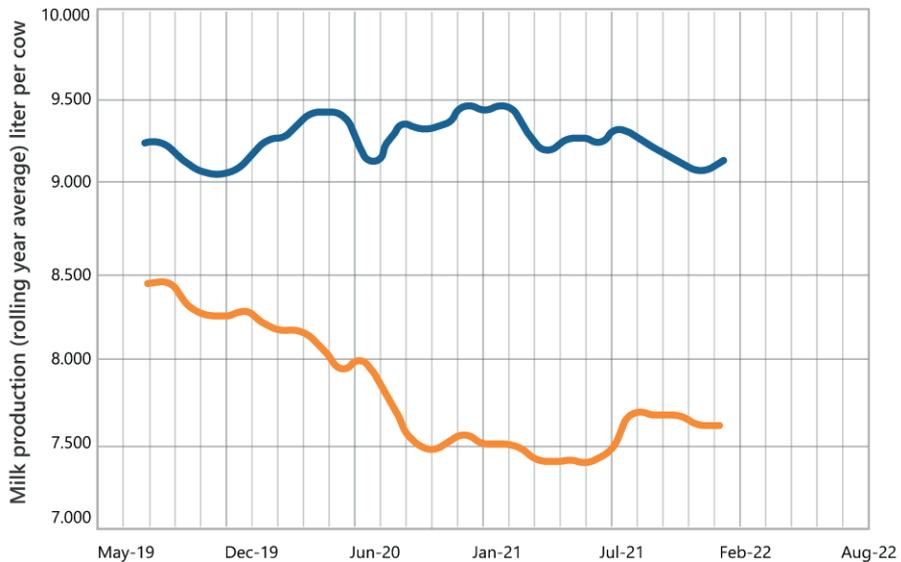

- Salmonella antibody level of farm (xxx) with increasing Salmonella pressure
- Average antibody levels of 10 farms around farm (xxx)

..... which have a drastic effect on the farm's milk production, compared to a group of non-infected farms

Milk production history (rolling year) at a farm with increasing Salmonella infection pressure

- Average milk production (rolling year) of 10 farms near farm (xxx)
- Milk production (rolling year) of a farm (xxx) with increasing Salmonella infection pressure

*Cost**

*1,65 euro per dairy cow
0,15 euro per dairy goat
per month*

**Calculations based on an average farm
with 110 dairy cows or 1200 dairy goats*

Who is the FMM for?

Farmers and their veterinarians

Feed mills

Dairy plants, co-ops

Farm visitors/supervisors

Pros of the FMM

1

Sustainable and environmentally friendly farming

2

Animal welfare and cost friendly

3

Control and insights in farm management

4

Increased productions with less animals, supports extra lactations

5

Preventive disease and essential nutrients control

6

Supports the choice for using feed additives

What farmers say about the Farm Management Monitor

"You are always ahead of the problem"

"Makes my daily life easier, no surprises..."

"I would recommend it to any livestock farmer"

"It's really about providing solutions for the farmer, helping to make decisions easier!"
The insights they need to be able to run the farm effectively"

"Always on time and up to date"

"Very nice to know what's going on in your company"

I say,
DO IT!
